BOTTLE CAP GAMING

MUTANT CANDY LAB

A Hold & Win in a mad professor's candy lab. Four flasks merge, mutate and clone cookies, or keep the bonus going.

96.68%
RTP, every mode

25,000×
Max win

1 in 160
Hold & Win, Regular Spin

HOW IT PLAYS

Cookies feed four flasks. When they overload, Hold & Win starts, and the flasks that started it work on the cookies.

MERGE
Joins two cookies into one

EVOLUTION
Doubles a cookie or lifts a super-cookie a tier

CLONE
Copies a cookie into a free cell

ADRENALINE
Four attempts instead of three

PLAY MODES

MODE	COST PER ROUND	WHAT IT DOES
Regular Spin	**1×**	The ordinary round; Hold & Win about 1 in 160 spins
Booster	**3×**	Cookies drop more often; Hold & Win about 1 in 32 spins
Random Mix	**150×**	Hold & Win every round, with one to three random flasks
Reactor Start-Up	**250×**	About half the time: Hold & Win with three or four flasks. Otherwise the round pays 50×
All Flasks	**750×**	Hold & Win every round with all four flasks, and bigger super-cookies more often

Prices and payouts are multiples of the base play amount. RTP 96.68% and maximum win 25,000× the base play amount in every mode. A round of Random Mix or Reactor Start-Up always pays at least 50×, All Flasks at least 150× — less than the price of the round.
